## **Brilliant home entertainment:**

### **AOC introduces the 80cm LCD-TV**

**Berlin, 16 February 2010 – AOC is expanding its wide range of innovative TV displays. The L32HA91, an impressive 16:9 widescreen LCD-TV, suits near to any furnishing style. With its 80cm diagonal, the classic black flat screen offers sharp HDTV entertainment in widescreen format. Its numerous connection ports make it the ideal focal point for home entertainment.**

AOC's latest full HD flat screen TV boasts contrast rich, light and brilliant images in intense colours. Thanks to its lightning fast 5 millisecond reaction time, the L32HA91 can depict even action-packed scenes with perfect fluidity. In addition, a wide 178° viewing angle ensures that colour and contrast stay true to form no matter where viewers are sitting while two 10 watt speakers discreetly integrated into the display body make for optimum sound.

The new 80cm L32HA91 model can also function as a complete multimedia centre, a fact many users are sure to appreciate. Its multiple analogue and digital ports including 3 HDMI's with HDCP, 2 SCARTs, component, D-sub and composite, allow camcorders, DVD players, gaming consoles or computers to be easily connected and used.

# AOC Press Release

Whether enjoying a blockbuster, picture evening, online session, game or sharing home videos with friends, AOC's new model offers nearly limitless home entertainment possibilities. Those still looking for an LCD TV to follow the football event of the year need look no further – this TV is sure to be the favourite.

The L32HA91 market launch is planned for March; a retail price has yet to be determined.
